ABOUT US

Blaize.Security is a world class web3 security provider, specializing in web3 security audits, blockchain/consensus audits, security researches and decentralized technologies due diligence. We operate with the newest technologies in order to build a safe environment for web3 ecosystems and secure 25+ blockchain ecosystems.

We provide auditing services for each component of decentralized platform: smart contracts, SDKs, periphery services/workers, dApps, blockchain nodes, and others. Blaize.Security team is proud of our deep expertise in blockchain engineering and RnD - we can work with almost any technology, as we develop custom auditing techniques for each component and each tech.

COLOR PALETTE

Our color palette is an integral part of the visual style, embodying key aspects of our project. Black color Symbolizes the reliability, durability and impeccability of our technological solutions. A color of safety that guarantees stability in every operation. Red Color Expresses passion, strength and attention to detail. This color emphasizes our commitment to safety, creating a feeling of confidence and caution.

TYPOGRAPHY

Its clear, aesthetic forms bring harmony to every letter, and stylish lines create a unique visual aura. Discover how this font adds sophistication and modernity to our content, making it irresistible and memorable.

TEAM

Blaize.Security has dedicated team of 25+ Security auditors who covers:

- Smart contracts auditing: EVM chains contracts (Solidity/Vyper), StarkNet (Cairo), ICP (Motoko), Flow, etc;
- Rust auditing (Near, Solana, Secret Network, etc)
- Interoperable auditing: auditing for Polkadot ecosystem (Rust+Substrate) and Cosmos ecosystem (Cosmwasm + Rust)
- Move auditing (Sui, Aptos)
- Blockchain auditing: auditing EVM-chains (Golang), Bitcoin-family chains (C++), Cosmos-compatible chains modules (Golang), validating consensus, etc
- web3 engineering: dApps audits, backend services, SDKs, APIs, etc

Blaize.Security team is proud of our deep expertise in blockchain engineering and RnD direction - so we can work with almost any technology, as we develop custom auditing techniques for each component and each tech.
